Figure 7: Number of interactions for each weather condition included in the dataset. Conditions are: C (Clear), PC (Partially Cloudy), O (Overcast), R (Rain), and S (Snow). Combined conditions are represented by multiple abbreviations, e.g., R,PC stands for Rain and Partially Cloudy.

Figure 8: Distribution of the temperatures.

Figure 9: Distribution of the precipitation types.

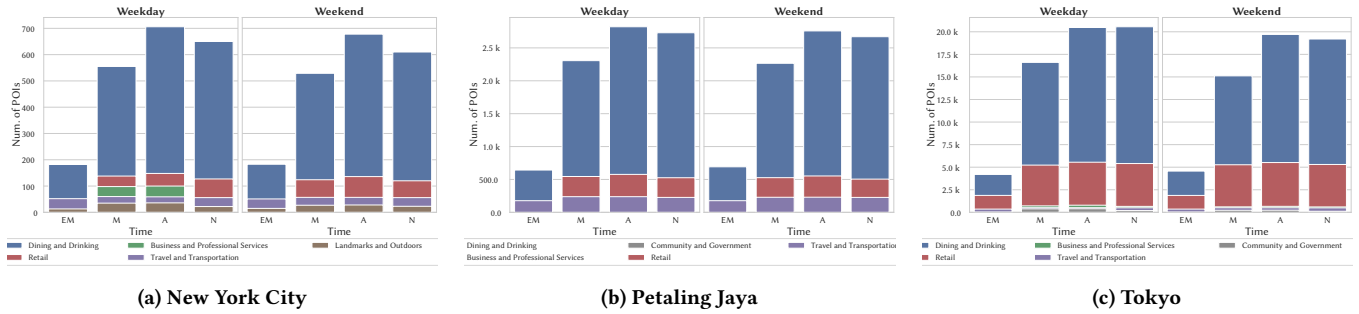

Figure 10: Number of POIs open during each time segment of the day: Early Morning (EM), Morning (M), Afternoon (A), and Night (N). For each city, two plots are shown: each plot displays the number of open POIs per category, focusing on the top 10 most represented categories, where the time corresponds to weekdays (left) or weekends (right).
